

CartêGraph Certifies Pacific Alliance as an Implementation Partner

September 17, 2008 - CartêGraph has certified Pacific Alliance as an Implementation Partner. Dave Philp has been hired to lead Pacific Alliance's Asset Management practice. He brings his years of experience in training, business analysis and system implementation together with his extensive knowledge of the Municipal domain to assist clients with the change management required for effective implementation of Asset Management systems. As a member of the StarDyne Group, Pacific Alliance is in a great position to leverage data in Municipal Financial, Asset Management and GIS Systems for use in PSAB compliance.

"The goal of our business partner program is to build relationships with organizations that extend our market reach, offer unique expertise and make both parties more formidable entities in our respective industries," said Dave Robbins, Vice President of Sales at CartêGraph. "We feel Pacific Alliance can meet and exceed all these expectations as a certified implementation partner and reseller. With their extensive knowledge in ESRI implementations for engineering and public works we will continue to meet the growing demands of our clients."

"We have been helping Canada's Local and Regional Governments implement Asset Management systems to help with PSAB compliance", said Chris Webber, President of Pacific Alliance. "Through that process we identified CarteGraph as one of the leading Asset Management providers and this is another step that we are taking to help our clients meet their Asset Management requirements."

The Public Sector Accounting Board (PSAB) (www.psab-ccsp.ca) has new rules for the accounting of tangible assets by government. Canada's Local Governments are beginning to implement business processes today to prepare comparative financials for 2008 and for adoption of PSAB 3150 in 2009.

As an industry leader, CartêGraph (www.CarteGraph.com) understands all the challenges Local Governments face choosing and implementing the right automated system for your community. With more than 1,000 clients across North America, they provide technical innovation with the insightful consultation and expert service expected by our users. CartêGraph provides unrivaled service from the beginning as we help identify client needs and implement the most efficient and effective public works management system. With expertise and experience, CartêGraph provides the best public works enterprise-wide solutions for your constantly evolving needs.

StarDyne (www.StarDyNETech.com) is a technology company focused on the local government and education areas of the public sector, providing strategic leadership with a long-term investment perspective to support our companies.

Through its [Group Companies](#), StarDyne offers alternative or complementary software solutions to satisfy the complex software requirements of our public sector customers. A growth driven company, StarDyne has invested substantially in its companies through product development, market expansion and acquisitions. StarDyne now serves over 500 customers in its government solutions division and 100 school districts, servicing over 4500 schools in its education solutions division.

Pacific Alliance Technologies (www.pat.ca), a member of StarDyne Technologies, provides proven CAD and GIS solutions and services for local and regional governments. Easy, flexible and affordable, Pacific Alliance's solutions enable government staff to manage, query and analyze spatial, attribute and financial information. Delivered via a web browser, data is integrated from multiple sources to deliver a solution that streamlines Asset Management and facilitates self-service for the public. With a combined 120+ years of technical experience, Pacific Alliance is lauded in the industry as a GIS technology and service provider.
