

We are a leading provider of GIS, architectural and engineering solutions for asset management and sustainable design.

Do what you do best.

Mastery = Results

Our services, from development to support, have helped hundreds of companies eliminate bottlenecks and realize their ideas.

Development

With years of experience in a diversity of platforms and languages, we make technology your advantage.

Customization

Tired of canned software that doesn't measure up? Try our customization to boost productivity and maximize your ROI.

Asset Management

Improve service quality and resource deployment while meeting your regulatory requirements.

Migration

We facilitate seamless transitions through training, consultations and managed implementations.

Implementation

Eliminate duplication. Our approach reinforces your workflows, saving you time and money.

Training

Ensure application know-how by enrolling staff in our robust, applied Autodesk/Bentley training.

Support

Implementation is not the end; with ongoing support, we continue to respond to your needs.

"Our strong working relationship with Pacific Alliance Technologies and their dedication to their clients' needs makes this company a pleasure to do business with."

Wayne Elsner
Senior Geologist
Alberta Energy Resources
and Conservation Board

"With the advantages of Revit and Pacific Alliance Technologies' technical proficiency with the product, we've gained huge efficiencies and increased our profile in the market."

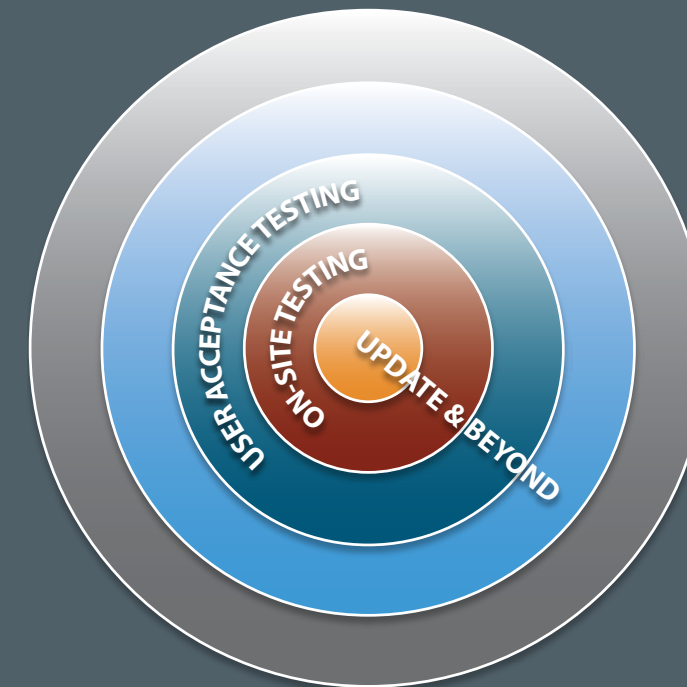

Craig Taylor
Principal
Christopher Bozyk Architects

"Pacific Alliance Technologies has been instrumental in helping us improve our customer service and response times by creating a web-based GIS system for us."

Dan Griffin
GIS Coordinator
Resort Municipality of Whistler

Expert Approach

We combine a solid approach with expertise and proven software to produce effective and creative solutions.

Analyze

Assess issues and recommend BIM, GIS and Civil software to optimize your ROI

Create

Streamline your workflow creating CAD/model-based design standards

Integrate

Add financial, CRM and asset management dimensions to your GIS using Cohesion software

Publish

Consolidate the view of your assets with our iVAULT environment

Maintain

Schedule updates automatically and manage data and systems strategies

"Leveraging their expertise, Pacific Alliance Technologies migrated our public GIS site to MapGuide Enterprise and did a great job."

Jonathan Mark
GIS Manager
City of Vancouver

"Your company's hands-on, no-nonsense approach to complex technology is refreshing."

Leanne McFadden
Geospatial Info. Manager
Challenger Geomatics

"Pacific Alliance Technologies' commitment to building information modeling (BIM) fits well with our objective of designing sustainable buildings."

Bill Moore
Practice Technology Coordinator

Pacific Alliance Technologies—a member of StarDyne Technologies Inc.—is a leading provider of Geographic Information Systems (GIS), asset management, web-based mapping, architectural, and engineering software, specializing in the customization, implementation, training and support of these solutions. Flexible and affordable, Pacific Alliance Technologies develops and implements solutions to sharpen your edge and increase productivity.

As an Autodesk® Value Added Reseller and Premier Solutions Provider, Pacific Alliance Technologies has helped hundreds of firms throughout Canada implement and train their staff on Autodesk CAD, GIS, and AEC solutions, such as AutoCAD, Map 3D, MapGuide Enterprise, Civil 3D, AutoCAD Architecture and the full Revit product line—Architecture, Structure and MEP.

Pacific Alliance Technologies provides a unique perspective gained from being a member of the Bentley Developer Network, a member of the ESRI Developer Network and by being Microsoft Gold Certified. This perspective allow us to be a leading provider of software and service to architecture, engineering, construction, government, utilities, telecommunication, oil & gas, mining, facilities management, and transportation.
